INTRODUCING THE D51i-22

Komatsu D51EX-22 With Typical Aftermarket Machine Control System

We’ve Made Great, Greater
Customer Driven Solutions, For Your Machine Control Needs

Introducing The Next Generation Of Machine Control

>> D51EXi-22
Innovative
Automated operation from rough dozing to finish grade.

>> D51PXi-22
Intelligent
New dozing mode, load control performance features.

Integrated
Standard factory installed integrated system.

No Cables
No coiled cables between machine and blade.

No Climbing
GNSS antenna and mast removed from blade.

No Connections
No daily connections required between machine and blade.
Factory Installed Machine Control Components
Machine control components are factory installed and designed as an integral part of the base machine for improved durability.

Komatsu Quality
Machine control components and system validated to Komatsu’s rigorous quality & durability standards.

Industry Standard Compatibility
Machine control system makes use of common industry design data file norms and supports typical base station communication.

Simple Operator Interface
Simple touch screen control box with multi-color customizable display.

3D GNSS Machine Control Standard
All on-machine components standard including control box, GNSS receiver/radio, GNSS antenna, and enhanced inertial measurement unit sensor.

Finish Grade Performance
Enhanced sensor package and intelligent logic provides for finish grade accuracy in an integrated system without traditional blade mounted sensors.

Stroke Sensing Hydraulic Cylinders
Robust stroke sensing hydraulic cylinders employee proven Komatsu sensor technologies for accurate finish grade performance.

Enhanced Inertial Measurement Unit (IMU+)
Chassis mounted enhanced inertial measurement unit (IMU+) and intelligent logic provides for finish grade accuracy without blade mounted sensors.

Cab Top GNSS Antenna
No blade mounted GPS antennas, cables to worry about damaging with cab top GNSS antenna.

Automatic Dozing From Start To Finish
Load control intelligence controls blade elevation to improve productivity and minimize track slip by adjusting blade load. 1.0’ from grade or 0.1’ from grade – you can run in auto mode.

Intelligent Dozing Mode Settings
Operators are able to select between 4 distinct machine control operating modes to optimize performance to the application whether cutting, spreading, or other.

Operator Selectable Load Settings
Machine control load settings can be adjusted between presets to tailor response to material conditions.

Komtrax equipped machines can send location, SMR and operation maps to a secure website utilizing wireless technology. Machines also relay error codes, cautions, maintenance items, fuel levels, and much more.
Factory Integrated Sensor Package

Typical blade mounted components are replaced with factory installed cab top GNSS antenna, enhanced inertial measurement unit (IMU+), and stroke sensing hydraulic cylinders. Komatsu durability & quality with factory installation, integration.

Cab Top GNSS Antenna

No blade mounted GNSS antenna(s), cables to worry about damaging with cab top GNSS antenna. Reduced risk of theft due to low visibility as viewed from ground level.

Enhanced Inertial Measurement Unit (IMU+) 

Chassis mounted enhanced inertial measurement unit (IMU+) and intelligent logic provides for finish grade accuracy without blade mounted sensors. Positional updates up to 100Hz.

Stroke Sensing Hydraulic Cylinders

Robust stroke sensing hydraulic cylinders employ proven Komatsu sensor technologies for accurate finish grade performance. Stroke sensing angle cylinder allows machine control system to know the angle of the blade.
Operator Selectable Load Settings

Machine control load settings can be adjusted between presets to tailor response to material conditions. From dry loose sandy soils to wet heavy clay materials, system performance can be targeted accordingly.

Improved Machine Control Efficiency

Up to 9% more efficient dozer operation than typical aftermarket machine control systems with Komatsu’s intelligent machine control. This is on top of already large time savings that standard machine control offers over manual staking & grading.

As-Built Surface Track Mapping

Cab top GNSS antenna provides for accurate as-built surface data collection by measuring actual elevations as machine continuously tracks in operation. Progress can be measured in real time with operator selectable settings.

Standard Touch Screen Control Box

Factory installed and features simple, easy to use operator interface. Mounted high for excellent visibility, viewing angle is adjustable per operator preference.
PRODUCTIVITY & ECOLOGY FEATURES

**ecot3**
This engine is EPA Tier 3, EU Stage 3A and Japan emissions certified; “ecot3” - ecology and economy combine with Komatsu technology to create a high performance engine without sacrificing power or productivity.

**Fuel Efficient Electronic Controlled Engine**
The Komatsu SAA6D107E-1 engine delivers a net output of 97 kW (130 HP) at 2200 rpm. The powerful Komatsu engine incorporated into the D51i-22 makes this dozer fuel efficient and the logical choice in both grading and dozing operations. The engine is turbocharged and features direct fuel injection and air-to-air aftercooling to maximize power, fuel efficiency, and emission compliance. To minimize noise and vibration, the engine is iso-mounted to the main frame.

**Long Track-on-ground and Oscillating Track Frame**
Long track-on-ground and oscillating track frame improves machine stability and grading/dozing performance.

**Hydraulically-driven Cooling Fan**
The engine cooling fan rotation speed and direction is electronically controlled. The fan rotation speed depends on engine coolant and hydraulic oil temperatures; the higher the temperature, the higher the fan speed. This system increases fuel efficiency, reduces operating noise levels, and requires less horsepower than a belt-driven fan. Additionally, cool ambient air is pulled in through perforations in the rear access doors adding to its cooling efficiency.

**Hydrostatic Transmission (HST) Control System**
The HST controller monitors engine output and work equipment/travel load. It controls HST pump and motor displacement to provide the optimum speed and drawbar pull. Power to both tracks during turns and counter-rotation makes the D51 extremely maneuverable.
HST with Electronic Control
The D51 is equipped with a Komatsu-designed Hydrostatic Transmission (HST) that allows Quick-Shift or variable speed selection. The HST consists of dual-path closed-circuits with two variable displacement piston pumps and two variable displacement travel motors. Hydrostatic steering eliminates steering clutches and brakes, providing smooth powerful turns. Fully electronic control provides full automatic shifting and enables smooth control. Engine speed is controlled using an electronic fuel control dial.

Comfortable Ride with Cab Damper Mounting
The D51’s cab mount uses a cab damper system that provides excellent shock and vibration absorption which conventional mounting systems are unable to match. The silicon oil filled cab damper mount helps to isolate the cab from the machine body, suppressing vibration and providing a quiet, comfortable operating environment.

Electronic Controlled Hydraulic System (EPC) Blade Control Joystick
Blade control joystick uses the EPC valve and joystick. EPC control combined with the highly reliable Komatsu hydraulic system enables superb fine control. A switch is used to angle the PAT blade. A button to activate float is also provided.

Closed-center Load Sensing System (CLSS) Hydraulic System
With CLSS hydraulics, blade lever stroke is directly proportional to blade speed, regardless of the load and travel speed. This results in superb fine controllability.

Palm Command Control System (PCCS)
The low-effort PCCS joystick controls all directional movements including machine travel speed as well as counter-rotation.
**Parallel Link Undercarriage System (PLUS)**
Komatsu’s new Parallel Link Undercarriage System (PLUS) provides less downtime plus longer wear with up to 40% lower undercarriage maintenance costs. Rotating bushings eliminate the cost and downtime for bushing turns, and strengthened rollers and links increase wear life up to two times. With PLUS, individual links can be replaced and no costly track tools are required. The track frames accommodate both PLUS and conventional systems.

**Monocoque Track Frame**
Komatsu’s monocoque track frame design using thicker box section material and fewer welded components provides increased rigidity and strength.

**Self-adjusting Idler Support**
The self-adjusting idler support provides constant and even tension on idler guide plates reducing noise and vibration and increasing undercarriage life.

**Heavy-duty Undercarriage**
Large link, large bushing diameter, and wider sprocket teeth extend undercarriage life. The two-carrier roller design maintains track tension and alignment.

**Modular Design**
One of the design goals behind the creation of the D51 was to manufacture a more durable machine. This was achieved by reducing component complexity and using a strong modular design for increased serviceability and durability.

**One-piece Nose Guard**
Simplified high-rigidity structure with thicker plates reduces vibration and noise.

**Dozer Frame**
Steel castings reduce the number of welds, improving C-frame rigidity and strength.

**Mainframe**
High-rigidity simple hull frame structure combined with thick plates and steel castings provide increased reliability and durability.
Hydraulically-driven Swing-up Fan
The D51i-22 utilizes a swing-up fan with a gas strut-assisted lift locking system to provide easy access to the (side-by-side) radiator, oil cooler, and charge air cooler. The swing-up feature makes it easier to access cooling cores. The hydraulic fan has a “cleaning” mode. The fan rotates in the reverse direction and helps to clear off objects in front of the cooling areas. The fan is protected by thick steel louvers and an additional fan screen for added durability.

Daily Checks
All daily checks can be performed efficiently at ground level.

New Monitor with Self-diagnostic Function
The monitor system provides critical information about the machine. It provides operating condition status and notifies the operator with a lamp and buzzer when an abnormality occurs. In addition, fault codes are indicated to aid troubleshooting and help reduce machine downtime. Service reminders for fluids and filters are also indicated. KOMTRAX adds a valuable dimension to troubleshooting and maintenance.

Remote Grease Points
Remote grease points facilitate lubrication of the C-frame pivots, equalizer center pins, and angle cylinder bearing.

Segmented Sprocket Teeth
This design reduces servicing time as compared to solid sprocket designs. Each of the nine bolt-on segments can be replaced without splitting the track.

Adjustment-free Parking Disc Brake
An adjustment-free spring-applied hydraulic-release wet parking brake is located in each final drive. Dynamic HST braking is used until the machine stops moving, then the parking brake engages, minimizing wear.

Easy Engine Oil Drain
Changing the engine oil is easy with a strategically mounted access cover. There is no need to crawl under the machine to drain the engine oil. An ecology drain and hose is provided to minimize spillage.
Komatsu Extended Coverage
- Extended Coverage can provide peace of mind by protecting customers from unplanned expenses that affect cash flow
- Purchasing extended coverage locks in the cost of covered parts and labor for the coverage period and helps turn these into fixed costs

Komatsu Parts Support
- 24/7/365 to fulfill your parts needs
- 9 parts Distribution Centers strategically located across the U.S. and Canada
- Distributor network of more than 300 locations across U.S. and Canada to serve you
- Online part ordering through Komatsu eParts
- Remanufactured components with same-as-new warranties at a significant cost reduction

Komatsu Oil and Wear Analysis (KOWA)
- KOWA detects fuel dilution, coolant leaks, and measures wear metals
- Proactively maintain your equipment
- Maximize availability and performance
- Can identify potential problems before they lead to major repairs
- Reduce life cycle cost by extending component life
KOMTRAX EQUIPMENT MONITORING

WHAT

- KOMTRAX is Komatsu’s remote equipment monitoring and management system.
- KOMTRAX continuously monitors and records machine health and operational data.
- Information such as fuel consumption, utilization, and a detailed history aids in making repair or replacement decisions.

WHEN

- Know when your machines are running or idling and make decisions that will improve your fleet utilization.
- Detailed movement records ensure you know when and where your equipment is moved.
- Up to date records allow you to know when maintenance was done and help you plan for future maintenance needs.

WHERE

- KOMTRAX data can be accessed virtually anywhere through your computer, the web or your smart phone.
- Automatic alerts keep fleet managers up to date on the latest machine notifications.

WHO

- KOMTRAX is standard equipment on all Komatsu construction products.

WHY

- Knowledge is power - make informed decisions to manage your fleet better.
- Knowing your idle time and fuel consumption will help maximize your machine efficiency.
- Take control of your equipment - any time, anywhere.

Monthly Operational Analysis

Location/Hours/Working

Fleet Working Status

For construction and compact equipment.

For production and mining class machines.
**ENGINE**

Model...............................................................Komatsu SAA6D107E-1*
Type.........................................................4-cycle, water-cooled, direct injection
Aspiration..................................................Turbocharged, air-to-air aftercooled
Number of cylinders...............................................6
Bore x stroke................................................107 mm x 124 mm 4.21" x 4.88"

**FINAL DRIVES**

Two-stage planetary gear integrated into axial piston travel motors. Compact in-shoe mount reduces risk of damage by debris. Bolt-on sprocket segments for easy replacement.

**STEERING SYSTEM**

Palm Command Control System (PCCS) joystick control for all directional movements. Pushing the joystick forward results in forward machine travel, while pulling it rearward reverses the machine. Simply tilt the joystick to the left or right to make a turn. Tilting the joystick fully to the left or right activates counter-rotation. Hydrostatic Transmission (HST) eliminates steering clutches and brakes, providing smooth powerful turns. Fully electronic control enables smooth control. The PCCS utilizes shift buttons to increase and decrease speed.

Minimum turning radius*
D51EXi-22.......................... 2.39 m 7’10”
D51PXi-22.......................... 2.62 m 8’7”

*As measured by track marks on the ground at pivot turn.

**UNDERCARRIAGE**

Suspension........................................Oscillating equalizer bar and pivot shaft
Track roller frame.................................Monocoque, large section, durable construction
Rollers and idlers........................................Lubricated track rollers
Lubricated tracks......................................Unique seals help prevent entry of foreign abrasive material into pin to bushing clearances for long service life.
Parallel Link Undercarriage System (PLUS)
Increased component size and strength, and rotating bushing design provide extended wear life and lower maintenance.

STANDARD EQUIPMENT FOR BASE MACHINE*

- Air cleaner, dry, double element type with caution lamp on monitor
- Decelerator pedal
- Fan, hydraulic driven, electronic control, reversible
- Water separator
- Alternator, 60 amp (24 V)
- Back-up alarm
- Batteries, large capacity 1000 CCA, 170 Ah
- Starting motor, 5.5 kW
- Brake pedal
- Electronically controlled Hydrostatic Transmission (HST) with Quick-shift and variable speed settings
- Track roller guards, center and end section
- Track shoe assembly w/sealed and lubricated link assembly:
  - D51EXi-22: 560 mm 22" HD single grouser shoes PLUS
  - D51PXi-22: 710 mm 28" HD single grouser shoes PLUS
- Crankcase guard and underguard
- ROPS/FOPS*
- Sprocket inner guard
- 12 amp (12V) power port (cab only)
- Seat, high back, cloth, suspension type
- Cigarette lighter (24 V, cab only)
- Cup holder
- Electronic monitor panel with on-board diagnostics
- Foot rests, high mounted
- Horn
- AM/FM radio
- Rearview mirror
- Power Angle Tilt dozer assembly, inside arms (EX: 3045 mm 10’ blade, PX: 3350 mm 11’ blade)
- Intelligent Machine Control
- Filter cap locks and cover locks
- KOMTRAX function Level 2+
- Lighting package - (3 front, 2 rear cab)
- Pullhook, front

* ROPS cab must be ordered for all machines. Cab FOPS Level 2. ROPS/FOPS meets all OSHA/MSHA standards and regulations criteria.

Dozer assembly and rear-mounted equipment are not included in base machine price.

OPTIONAL EQUIPMENT

- Drawbar, long type
- Track roller guard, full length
- Hitch
- Guarding
- Multi-shank ripper (for D51EXi/PX)

ALLIED MANUFACTURER’S ATTACHMENTS (SHIPPED LOOSE)

- Hydraulic winch
